## EXPERIENCE

**Government of Alberta, *Data Analyst*** | *Databricks Power BI, SQL* May 2024 – Present

- **Migrated a big data, manual Excel pipeline to an automated Databricks ETL pipeline** with a medallion, star schema architecture, feeding a Power BI semantic model and executive visuals via a SQL warehouse; cutting monthly processing from 2 days to under 10 minutes.
- **Led advanced SQL & R analysis** of 45M+ records, developing relational data models and applying economic modelling techniques to identify KPIs quantifying migration's impact on Alberta's labour market.
- **Developed an R automation application,** leveraging Claude **AI** to automate annual reporting across 18 industries and 9+ datasets, reducing reporting time by ~95%

**Government of Canada, *Junior Economist*** | *Power BI, R, Python* Jan 2024 – May 2024

- Developed an automated **Power BI** dashboard synthesising web-scraped and government emissions data to provide real-time source mapping and three years of historical analysis.
- Led data analysis, reporting, and visualization in R for one of seven segments of an economic analysis of the Prairies **presented to senior government leadership.**
- Collected, cleaned and analysed **structured and unstructured economic data** using Python, identifying trends and patterns to support evidence-based decision-making.

**Deloitte Consulting, *Data Science Intern*** | *R, Tableau, SQL* May 2022 – Aug 2022

- Developed a logistic regression model to predict customer churn risk, applying **predictive analytics and statistical modelling** to exceed identification targets by 10% .
- Conducted customer churn analysis for a $12.41B telecommunications company, using Python and Jupyter Notebook to identify behavioural patterns across 400K+ customer records.
- Queried and transformed customer data using SQL and developed Tableau visualizations to communicate churn patterns and actionable insights to stakeholders.

## PROJECTS

**Youth LMI Databricks Pipeline** | *Databricks, Data Pipeline, Power BI*

- Built an end-to-end Databricks pipeline ingesting multiple sources of data into Unity Catalog, with a medallion architecture and star schema gold layer. Automated monthly incremental loads into scheduled jobs, feeding a Power BI dashboard with KPIs , filter-aware dynamic insights and fast refresh times.

**Skilled Trades Insight Dashboard** | *Power BI, Data Pipelines, Automation*

- Designed an end-end Power BI dashboard to analyze and visualize skilled trades labour market trends.

**Industry Reports Automation** | *R, Data Pipelines, Automation*

- Automated data pulling and report generation for **18 industries** processing **2M+** rows of data.

## EDUCATION

**University of Alberta** Edmonton, Alberta

Bachelor of Arts, Economics

- **Relevant Coursework:** Data Analysis with Python and R, Economic Forecasting, Financial Economics
- First Class Academic Standing (GPA >3.5)

## SKILLS

**Software Tools:** SQL **(**Window functions, CTEs, Subqueries, Advanced Joins), Python, R, Power BI (KPI development, Semantic Modelling, Advanced DAX, Data Governance), Relational Database, Tableau, Agentic Coding , Advanced Statistics (Visual Analytics, Statistical Analysis, Predictive Modeling), ETL, Cloud Computing, Databricks, API, Git Version Control, A/B testing, Plotly, Data Gathering, Data Storytelling, ELT/ETL.
