EDUCATION

University of Alberta Edmonton, Alberta
Bachelor of Arts, Economics

- **Relevant Coursework:** Data Analysis with Python and R, Economic Forecasting, Financial Economics
- First Class Academic Standing (GPA >3.5)
- Multiple scholarship award recipient.

EXPERIENCE

Government of Alberta, *Economist* | *Power BI, R, SQL* May 2024 – Present

- **Owned the full analytics lifecycle** for a Labour Market Insights dashboard, synthesising millions of rows from multiple sources into **Databricks** and delivering an executive-ready **Power BI solution.**
- **Led advanced SQL & R analysis** of 45M+ records, developing relational data models and applying economic modelling techniques to identify KPIs quantifying migration's impact on Alberta's labour market.
- **Conducted business analysis** by developing a user-friendly R application that automates a recurring annual reporting process gathering data across 9 tables and 18 industries, **reducing reporting time by ~95%**.

Government of Canada, *Junior Economist* | *Power BI, R, Python* Jan 2024 – May 2024

- Developed an automated **Power BI** dashboard synthesising web-scraped and government emissions data to provide real-time source mapping and three years of historical analysis.
- Led data analysis, reporting, and visualization in R for one of seven segments of an economic analysis of the Prairies **presented to senior government leadership.**
- Collected, cleaned and analysed **structured and unstructured economic data** using Python, identifying trends and patterns to support evidence-based decision-making.

Deloitte Consulting, *Data Science Intern* | *R, Tableau, SQL* May 2022 – Aug 2022

- Developed a logistic regression model to predict customer churn risk, applying **predictive analytics and statistical modelling** to exceed identification targets by 10% .
- Conducted customer churn analysis for a $12.41B telecommunications company, using Python and Jupyter Notebook to identify behavioural patterns across 400K+ customer records.
- Queried and transformed customer data using SQL and developed Tableau visualizations to communicate churn patterns and actionable insights to stakeholders.

PROJECTS

Skilled Trades Insight Dashboard | *Power BI, Data Pipelines, Automation*

- Designed a end-end Power BI dashboard to analyze and visualize skilled trades labour market trends.

Energy Market Intelligence Dashboard | *Power BI, Data Pipelines, Automation*

- Real-time energy market dashboard built on StatsCan API pipeline, with AI powered insights generator.

Industry Reports Automation | *R, Data Pipelines, Automation*

- Automated data pulling and report generation for **18 industries** processing **2M+** rows of data.

Impact of Migration on Alberta Labour Force | *R, Economic Modelling, Labour Market Analytics*

- Applied counterfactual economic modelling on 2M+ labour force records to quantify the impact of migration on Alberta's labour force.

SKILLS

Software Tools: SQL **(**Window functions, CTEs, Subqueries, Advanced Joins), Python, R, SAS Power BI (KPI development, Semantic Modelling, Advanced DAX, Data Governance), Relational Database, Tableau, Claude, Advanced Statistics (Visual Analytics, Statistical Analysis, Predictive Modeling), ETL, Cloud Computing, Databricks, API, Git Version Control, A/B testing, Plotly, Data Gathering, Data Storytelling.
